

# TS3010 **HD**

Digital High Definition Satellite Receiver USB PVR Ready

Cod. Art. 21005248  
Cod. EAN 8024427017313

The TELE System TS3010HD is the new decoder designed to receive all free to air satellite channels, also in High Definition. The signal's digital quality, the PVR Rec & Play functions, the Timeshift and Mediaplayer functionality via USB, are just few of the most important features of this device. Possibility to upgrade the SW via OTA or USB.
