

TS5.9RX

multi-format dvd recorder

TS5.9RX is the new TELE System DVD Recorder capable of recording up to 11 hours of your favourite programs or films in DVD+/- DL, DVD +/-R and DVD+/-RW formats. The digital recording allows you to keep the Audio/Video quality of your videoclips unaltered from the original.

TS5.9RX can play films in DVD, DVD+/- DL, DVD +/-R and DVD+/-RW, videos in MPEG4 (DivX - XviD), audio files MP3, CD R / CD RW and photos in JPEG format.

The TS5.8RX DVD Recorder has been given an abundance of Audio/Video sources like the DV-IN connection on the front panel of the appliance, which is a simple and practical way for you to connect your video camera and watch or record the best of your holiday videoclips.

TELE System multi-format dvd recorders not only change video recording, they change habits.
