

TS5.8HDMI

hdmi multi-format dvd recorder

Watch, record and watch again all in impeccably high quality.

TS5.8HDMI is the new TELE System DVD Recorder capable of recording up to 11 hours of your favourite programs or films in DVD+/- DL, DVD +/-R and DVD+/-RW formats.

Digital recording allows you to keep the original Audio/Video quality of your video clips. TS5.8HDMI can play films in DVD, DVD+/- DL, DVD +/-R and DVD+/-RW, videos in MPEG4 (DivX - XviD), audio files in MP3, CD R / CD RW and photos in JPEG.

With the HDMI output you can transmit a high quality A/V digital signal to your television.

The TS5.8HDMI DVD Recorder is fitted with multiple Audio/Video sources like the DV-IN connection on the front panel of the appliance, which is a simple and practical way for you to connect your video camera and watch or record the best of your holiday videoclips.

The "UP-SCALING" software function will give you video quality that is clearly superior to general definition standards.

Silver and Black are the two colour options we have chosen for the TELE System TS5.8HDMI DVD recorder.

TELE System multi-format dvd recorders not only change video recording, they change habits.
