

TS6206DT

ZAPPER Digital Terrestrial Receiver

TS6206DT Digital Terrestrial Receiver gives you access to the whole range of free to view television and radio channels transmitted in digital terrestrial.

During standby, the receiver's "AUTOSCAN" function will automatically search for new channels and when you turn on your receiver it will advise you of the new channels it has found.

With the LCN function (Logical Channel Number), the channel list is ordered automatically.

What's more TS6206DT, with its PROTECTION SYSTEM option can limit the remote control functions to just channel change and volume control.

TS6206DT is compatible with Italian and European VHF frequencies.
