

# TS6207DT

## Digital terrestrial receiver

With the Digital Terrestrial Receiver TS6207DT you can see the entire offer of free TV and radio channels of the digital terrestrial television.

### Autoscan

The receiver automatically find new channels

Through the "AUTOSCAN" feature the receiver automatically searches for new channels, during the stand-by state; when you will turn it on, it will notify you of new channels found.

### Logical Channel Number

The receiver sorts the channels in a logical manner, without need for your intervention

Thanks to LCN (Logical Channel Number), the channel list is sorted automatically.

### Protection system

For those who have not yet accustomed to new technologies

Protection System limits the functionality of the remote control to change channel and volume control only

### Twin SCART and Timer function

You can program to switch on and off the receiver to record your favorite programs

With two SCART sockets you can connect your digital receiver to your VCR and program it to turn off and turn on to record your favorite programs!
