

TS4.3C

Digital satellite receiver with Common Interface

Product codes

TS4.3C: 21005090

The TS4.3C Common Interface Receiver with CI card slot, enables access to the most popular encrypted broadcasting programmes (SECA-Aston, Viaccess, Conax, Nagra, Irdeto). Among its main characteristics we would like to mention the Go To X motor function, the software upgrade via satellite and the automatic turn-on after black-out. The receiver comes already programmed and tuned into the main TV and radio programmes.
