

TS4.5HD-CI

HD digital satellite receiver

High Definition for all!

TELE System presents the revolutionary TS4.5HD-CI HD Common Interface digital satellite receiver, capable of receiving the whole range of free to air and pay to view channels by satellite

Thanks to its compatibility with High Definition transmissions, all you have to do is connect your receiver to a HD Ready or Full HD TV by the HDMI digital output and sit back and enjoy the astounding quality of images and sounds.

The option display, the advanced analog video component connections, HDMI digital and USB data connections, all make this an extremely comprehensive and high performance receiver.
