

# TS4500HD

## HD Digital Satellite Receiver High Definition - Common Interface

The new HD common interface satellite receiver TS4500 HD is able to decode satellite free to air channels and also pay TV channels through external common interface CAM.

Being compatible with High Definition broadcasting, it's enough to connect to device to a HD Ready or Full HD TV using HDMI digital output, to have the most wonderful and extraordinary image and sound quality.

Thanks to compact size and to attractive black design, TS4500 HD is part of new set top box generation.
