

TS8800

Real 3D – Portable navigation system

Product codes

TS8800 with ITALY Map: 28040025

TS8800 with WEST EUROPE (22 countries): 28040026

TS8800 with FULL EUROPE (44 countries): 28040027

The TS8800 Portable Car Navigation System disposes of a Real 3d graphic to visualize buildings, monuments and reliefs.

Furthermore, thank you to the integrated DVBT-tuner, you will be able to use it also as a DVBT- TV, once you have reached the chosen destination!

Among its many distinctive features there are the built-in telescopic antenna, the antireflection TFT LCD 4.3" display, the 16:9 widescreen touch-screen, the integrated stereo speakers and the "auto-scan" function, to watch your favourite TV-programmes wherever you are.

Thank you to the high-sensibility internal GPS SiRF GSC3 (SIRF-III/NMEA) module, the TS800 GPS is extremely fast and precise in calculating the chosen destination.

View the Infoclip

It is available in several versions: with the preinstalled maps of Italy (IT), West Europe (WEU), or Full Europe (FEU), displaying more than 13.000 safety cameras on the Italian territory.

Now you can use TSEnavi+, which allow you to update and upgrade your Navigation system!
