

# TS8411

## Portable GPS navigator with interchangeable covers

We are proud to present TS8411, the new navigation device by TELE System

### Turn ON & GO

Easy to use, just insert the SD Card and drive wherever you like. Handy and portable, not only in your car. Due to its own reduced dimensions, your GPS navigator can be put on comfortably in your pocket, helping you in your walking.

### Maps:

Go to TSEnavi+ now to be up to date! Sign up now, and don't miss the updates!

Reach your destination. On time navigation from beginning of your journey.

Relax your driving. Possibility to visualize the map and the route in 2D and 3D mode.

### Route, Itinerary, Warnings

Choose the right trip for you. Between the fastest, the shortest, the cheapest.

Enjoy your trip. Insert the Point of Interest (POI), the stops, the gas stations, the tourist places.

Drive in full safety. In case of any distractions or errors during your trip, you can use the "Off-Route recalculation" function, which allows you to recalculate the itinerary right away. Without dangerous turning in the opposite direction.

TMC Ready. Purchasing the TELE System TMC receiver, you will avoid traffic jams or delays when travelling.

Check your trip. How many kilometres/miles are still remaining, the expected duration and arrival time.

Don't waste your time. Find out easily the POIs and tourist areas in your destinations.

Keep calm in the traffic jam. On time indications of hard road junctions by arrows and visual traffic signals.

Keep attention at the road safety. By visual/audio warnings and the indication of the speed limits, you are always aware which is the right cruising speed.
