

TS2.0AS

mp3 player, radio and voice recorder

Simple, lightweight and ultra slim, just 8.9 mm, TS 2.0AS is the TELE System 2GB mp3 player with built-in radio and voice recorder.

The simplicity of its use and its design contain powerful advanced technology. With TS 2.0AS you can listen to your favourite music and thanks to the Lyrics files you can read the words of the songs directly on the display.

Thanks to the voice recorder in WAV format you can save interviews, conferences, memos and even record radio programs directly on your MP3 player. The LED 2-colour display eliminates any difficulty in reading the names of the tracks and what's more you can adjust the contrast for when it is dark.
