

TS1.6H

2.4 GHz digital wireless headphones

Product codes

TS1.6H: 23500051

The Digital wireless headphones TS1.6LI enables receiving any high-fidelity audio signal transmitted from a suitable TELE System transmitter just by connecting the transmitter (purchasable separately) through the suitable Line-in or USB port to an audio source (computer, TV, stereo HI-FI, MP3 player, etc.).

If you connect the transmitter for example to your computer, the audio signal will be transferred wireless from the computer to the headphones.

This headphone will give you the possibility to extend your wireless audio system without limits.

TECHNICAL SPECIFICATIONS

Receiver integrated in the headphones

Automatic source tracking

2 AAA batteries included

Up to 30 meters maximum receiving distance without obstacles

Frequency range

2400-2483,5 Mhz
