

TS8511

4.3" Portable GPS Navigator

When in doubt choose the best! A 4.3 inch touch screen panoramic display, evolved navigation software and a efficient processor rapid and precise viewing of extremely detailed routes. What's more the "lane advisor" function and speed limit signal will help you face any journey in safety. The TS8511 navigator has the exclusive iGO amigo software with its user-friendly functions and fashionable apperance, designed to make navigation accessible and appealing.

DISCOVER THE THREE DIMENSION. REAL 3D, A REAL REVOLUTION!

The route is child's play to follow. The buildings will roll by you so that you have no trouble whatsoever recognising them at an instant, the view of the slopes between junctions and land conformation will let you know exactly the kind of route you are taking so you can face it in all tranquility, enjoying a relaxing journey and in utter safety.
