

TS6812 DVB-T2 HEVC

DVB-T2 & IP HD H.265 Receiver - Videorecorder/Mediaplayer/Internet Radio

Product Code: 21005264
EAN Code: 8024427018358

TELE System introduces the new TS6812T2 HEVC, ultra slim design (height only 3 cm) it is already "READY" to receive the newest channels, broadcasted in DVB-T2, also in HD. Connecting a HDD through the USB port located on the front panel, the user can easily record the favourite programs and movies just selecting the REC & PLAY function. The TS6812 could also represent a media player device to play music, photos and video directly on the TV, also in the newest Mpeg4 H.265 compression. The LCN "Logical Channel Number" function sorts the channel list in a logic and automatic way, while the EPG "Electronic Program Guide" will provide always updated information. Remote control Decoder/TV included into the giftbox.
